

## Winners of the IUGS "Young Reporter" Award

### The **Video Report** category:

The top three winners in the video category are:

● **1st Place: Eva Corot (France)**

Video Title: How to Hack (Real) Clouds?

Eva's innovative approach to explaining cloud formation and manipulation captured the judges' attention, offering a unique perspective on this natural phenomenon.

● **2nd Place: Mario Celentano (Italy)**

Video Title: Part 1 - The Vesuvius and Its History

Mario's video provided a compelling historical account of Mount Vesuvius, combining historical context with geological insights engagingly and educationally.

● **3rd Place: Marine Maillot (France)**

Video Title: The Hoodoos of the Organs of Ille-sur-Têt: An Enchanting Landscape

Marine's video beautifully showcased the stunning hoodoos of Ille-sur-Têt, offering viewers an enchanting glimpse into this unique geological landscape.

### The **Written Report** category

The top three winners in the written category are:

● **1st Place: Edlyn Wang (United States)**

Report Title: Climate Change Amplifying Gulf Dead Zones

Edlyn's report stood out for its insightful analysis and thorough research on how climate change is exacerbating dead zones in the Gulf, offering a compelling narrative that highlights the urgency of addressing this growing environmental crisis.

● **2nd Place: Kevin Hao (Australia)**

Report Title: Life-or-Death Climate Crisis on the Great Barrier Reef, Australia

Kevin's exploration of the Great Barrier Reef's challenges was both comprehensive and passionate, shedding light on the life-or-death situation this natural wonder is facing due to climate change.

● **3rd Place: Devan Patel (Oman)**

Report Title: Gulf of Oman Hypoxic Crisis

Devan's report provided an in-depth look at the hypoxic crisis in the Gulf of Oman, demonstrating a strong grasp of the environmental and ecological impacts of this pressing issue.
